**EN** – Always follow the right dose of the product. In order to lower energy and water consumption as well as to reduce water pollution, remember about the full load of the washing machine and the use of the lowest washing temperature, i.e. 30 °C. Empty packaging should be recycled. Always remember to sort your waste. The waste generation should be avoided or minimized where possible. Due to the ecological nature of the product, washing at 90 °C is not recommended. Information on the local water and sewage company. The packaging contains a measuring cup that facilitates dosing. Ecological washing powder is enriched with an innovative detergent that washes effectively in all levels of water hardness.
